

ODRPC Protocols for Infectious Disease Risk Management

Current as of 1-July-2020

These protocols are required for ODRPC-sponsored clinics and events, and are highly recommended for ODR clubs for any lessons, clinics, or other events. They are minimum requirements, and more stringent local or facility procedures may apply and must always be followed.

In accordance with state orders, **gathering size** must be **limited to 250 people, or 50% of the facility's maximum capacity, whichever is less.** This includes instructors, participants, parents and siblings or other children, volunteers, and any other support personnel.

A **single point of entry** is highly recommended, and must be monitored. All who enter must be **medically screened** (see attached). Those who do not pass the screening may not be admitted. **Names and contact information** must be taken for every individual entering the premises.

Masks must be worn when indoors, including in a barn except when eating/drinking or only one person is in the room. Masks must **cover both nose and mouth**. Non-medical cloth masks are acceptable.

As much as possible, everyone should **avoid sharing of any equipment or handling of others' equipment**, such as grooming and feeding supplies, water buckets, tack, water bottles, etc, except by members of the same household.

Sanitize frequently touched surfaces and shared equipment (such as doorknobs, hoses, etc) at least 2 times per day, and more often if possible.

Encourage everyone to **wash hands frequently with soap and warm water for at least 20 seconds**, especially: **before eating, after using the bathroom, and before and after using any shared equipment.** When washing with soap and water is not possible, use **hand-sanitizer, rubbing vigorously**, instead. Hand sanitizer should be provided by the host club.

Social Distancing of 6' must be maintained wherever possible. When not possible, both people must **wear masks**, even outdoors. During meal/snack breaks, when masks cannot be worn, ensure people remain spread out. As much as possible, people should bring their own food/drinks, including utensils, to avoid sharing.

Post signs reminding everyone of proper procedure. Include this information in applications and competitor information if possible.

Enforce these procedures! By entering the facility during the gathering, they are consenting to these rules.

You must have **Contingency Plans** in case someone develops symptoms during the event or shortly afterwards. Have **medical personnel** on site when possible, or know how to **contact local emergency personnel** (such as 9-1-1). Designate a temporary **isolation area**. Record information about others who may have been in close contact with the individual. Inform the RS of the incident. Cooperate with contact tracing to help contain any possible outbreak.

Local orders and/or Facility procedures may be stricter than specified here. In these cases, **the strictest procedures must be followed.** Clubs may also impose more stringent requirements.
